Backend Engineer with 14 months of production experience building **distributed systems**, **microservices architecture**, and **scalable APIs** in high-throughput environments, delivering **80%+ performance improvements** in real-world systems.

SKILLS

- Languages:** TypeScript, JavaScript, Go, Python, SQL, Java
- Frameworks & APIs:** Node.js, Deno, FastAPI, REST, RPC, Edge Functions
- Cloud & DevOps:** Docker, CI/CD, Shell/Bash Scripting, Azure (Machine Learning, Blob Storage), Git / GitHub, Linux, k6
- Security & Concepts:** End-to-End Encryption (AES-256-GCM, ECIES), JWT, Row Level Security, Microservices, System Design, API Design
- Databases & Infrastructure:** PostgreSQL, Redis, Supabase, Celery, MinIO, Trino

WORK EXPERIENCE

- Software Engineer (Back-End), Intern** Feb 2025 - Apr 2026
PT Kalbe Farma Tbk Remote - Jakarta, Indonesia
- Migrated monolithic AI healthcare platform to **microservices architecture (FastAPI, Redis, Celery, MinIO)**, improving **throughput by ~80%** and reducing **latency by ~80%** (validated via **k6 load testing**).
 - Designed and implemented **end-to-end encryption (AES-256-GCM, ECIES)** for AI chatbot systems, securing **sensitive patient data** while maintaining compatibility with **JWT-based authentication**.
 - Built a distributed file processing pipeline for large-scale binary data using **Celery, Redis, and object storage (MinIO, Azure Blob Storage)**, enabling asynchronous processing and fault-tolerant execution.
 - Developed semantic search system for healthcare data, using **dual-database architecture (PostgreSQL + vector store)**, enabling **unified querying** across datasets via Trino and OpenCLIP, improving data retrieval efficiency.
 - Re-architected a legacy data integration system into event-driven microservices using **Supabase Edge Functions (Deno)** and **Node.js**, enabling scalable, maintainable, and real-time data processing.
 - Designed and implemented **RESTful APIs** for structured data systems, ensuring compliance with industry standards (FHIR R4), with full CRUD operations and schema validation.

PROJECTS

- Threelights Barbershop Management Platform** 
- Built a full-stack barbershop management system (**DenoTS, SvelteKit, Supabase**) with real-time scheduling, automated invoicing, AI Catalogue, and payment gateway integration (Midtrans) — **achieving 91.5% UAT** score across stakeholder testing.
- Rumah Akasha Venue Management System** 
- Built full-stack venue management platform (**Laravel + MySQL + Go**) with role-based access control (admin/staff/customer), real-time checklists, and automated reservation workflows serving active business bookings.

EDUCATION

- Bachelor of Science in Computer Science** Aug 2022 - Mar 2026
Bina Nusantara University • Malang, Indonesia GPA: 3.82
- Publications:** Authored 3 accepted research papers focusing on Deep Learning, UI/UX optimization, and Augmented Reality (ICCSCI, ICon-TINE, ICIMTech).

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

- Manager | Product & Curriculum** Oct 2024 - Oct 2025
Google Developer Groups on Campus Malang, Indonesia
Led a team of 8 to deliver 3 local and 1 inter-university events, coordinating external speakers and managing cross-division alignment.
- Core Team | Product & Curriculum** Sep 2023 - Jun 2024
Google Developer Student Clubs Malang, Indonesia
Organized 5 local and 3 international events, securing industry speakers and managing end-to-end event logistics.
- Bina Nusantara Computer Club** Oct 2022 - Sep 2023
External Event Organizer Activist Malang, Indonesia
Contributed to media partnerships, sponsorships, and planning across 2 major events.

PUBLICATIONS

- Refining interface of the Indonesian ministry of health's website based on user experience questionnaire (UEQ)**  on AIP Aug 2025
Publishing
- Implementing Augmented Reality to Address Cultural Appropriation Issue**  on Elsevier Oct 2023

LANGUAGES

- Bahasa Indonesia** (Native proficiency) • **English** (Professional working proficiency)
