Undergraduate Computer Science student at Bina Nusantara University with a strong passion for full-stack development and software engineering. Possess a critical understanding of data analysis that supports informed decision-making and drives impactful solutions. Committed to delivering high-quality results by leveraging my analytical and technical skills to create meaningful software applications and improve outcomes.

EDUCATION

Undergraduate Student of Computer Science Bina Nusantara University • Malang, Indonesia Student Activity : Accepted 3 research papers at the International Conference, namely 8th International Conference on Computer Science and Computational Intelligence 2023 3rd International Conference on Technology, Informatics, and Engineering ICON-TINE 2024 2024 International Conference on Information Management and Technology (ICIMTech 2024).	Aug 2022 - Present GPA: 3.72 of 4.0

PROJECTS

Mobile Application for 'Threelights Barbershop' Ongoing Project - Responsible for: Develop the reservation functionality: Allow users to make reservations. Implement full CRUD operations: Create, Read, Update, Delete for reservations. Create an invoice system: For ongoing reservations. Display reservation history: On the user profile page. Develop the owner's website: For managing customer reservations. Website for 'Rumah Akasha'  Led a team to develop a comprehensive management system for Rumah Akasha, coordinating with the owner and creating a structured timeline. - Built user authentication with three access levels for enhanced security and user experience. - Developed key features such as venue reservations, event registration, and a menu page showcasing best-sellers. - Created an owner dashboard with full CRUD capabilities for managing menu items, staff, and events. - Implemented a staff checklist feature to streamline event attendee tracking. Augmented Reality Application Development with Marker-Based Detection Technology (Mobile App)  Developed Geometry Solver mobile app using AR with marker-based detection for interactive learning of geometry. Enabled exploration of 2D and 3D shapes (cubes, prisms, pyramids, etc.) for enhanced visualization. Tracked user engagement, with 75% of users interacting with AR features multiple times, showcasing strong interest and potential for expansion.

SKILLS

Soft Skills: Critical Thinking, Leadership and Collaboration, Problem-Solving, Team Management, Communication

Technical Skills: C/C++, Java, HTML, CSS, Python, SQL, PHP, Go Language, Laravel, Dart, Kotlin, Flutter
Others & Tools: Supabase, Git, Figma, Bootstrap, Seaborn, Numpy, Matplotlib, Pandas

LANGUAGES

Indonesia (Native proficiency) • **English** (Professional working proficiency)

PUBLICATIONS

Implementing Augmented Reality to Address Cultural Appropriation Issue  on **ScienceDirect** **Oct 2023**
This paper discusses an AR app that immerses users in Indonesian culture, showcasing Bali and Papua through virtual scenes with iconic sites and traditional music. The app, designed for youth, is user-friendly and performs well in usability tests, fostering cultural pride and awareness.
